

Changing people's lives...
one pain at a time

Q Blankets

A Q Blanket is a therapeutic magnetic mattress pad which has our patented Q magnets to stimulate regeneration and provide pain relief, with a more restful sleep. All magnets have been orientated to the same direction and have a flux plate attached to focus the field for deeper penetration. You can test the strength of the sides of each magnet with metal containing iron. This is why for maximum penetration the instruction label sewn onto the blanket should be facing away from the body. One can use Q Blankets as a throw-over / blanket or simply lie on top and use as mattress pads.

What Doctors are Saying?

I recommend the Q Blanket to my patients because it provides general support for the central nervous system. The distribution of the Q magnetic field can provide greater tolerance to unwelcome electromagnetic field exposure and to life's external stressors.

Instructions for use:

- Drape blanket with instruction label facing away from the body
- Wash separately with warm water
- Do not tumble dry
- Made from Poly Fleece
- Contains QF28-3 Quadpolar magnets

WARNING:

Not to be used near a pacemaker or any magnetically programmable medical device or during pregnancy.

Made for Comfort

Made from quality polar fleece. Each Q magnet has its own flux plate glued to the back for extra penetration of the magnetic field.

Q magnets have been strategically placed in a matrix to provide the optimum circulation of equal amounts of magnetic field flow from both the north and south poles of powerful neodymium Quadrapolar rare-earth magnets.

Q magnets are a therapeutic magnet

Q Blanket Size Guide

Choose the size for body coverage. Half body or whole body, small or large.

Model Description	Product Image	Magnetic Matrix
<p>Q13 (Small)</p> <p>Contains 13 X QF28-3 Q magnets. Blanket size 90 X 70cm. Used for feet, upper torso or lower back. Weight: 1800 g</p> <p>RRP \$725</p>		
<p>Q20 (Treatment)</p> <p>Contains 20 X QF28-3 Q magnets. Blanket size 140 X 60cm. For long narrow treatment couch. Weight: 1900 g</p> <p>RRP \$990</p>		
<p>Q28 (Medium)</p> <p>Contains 28 X QF28-3 Q magnets. Blanket size 150 X 90cm. Used for whole body exposure. Weight: 2700 g</p> <p>RRP \$1,235</p>		
<p>Q35 (Large)</p> <p>Contains 35 X QF28-3 Q magnets. Blanket size 187 X 90cm. Used for whole body exposure. Weight: 3200 g</p> <p>RRP \$1,490</p>		

If used on a mattress, the instruction label should be facing down. If draped over (on top of) the body, the instruction label should be facing up. To provide a therapeutic field for the feet, the blanket can be used on bedding during sleep. Ensure the feet remain above the blanket as much as possible.

To provide a therapeutic field for the lower back. The blanket can be slept on or wrapped around the lower back. The Q blanket is made of four layers. An inner material which is glued between the Q magnets and flux plate. A layer of wadding for comfort and the two outer Poly Fleece.
